

# MD HABIBUR RAHMAN JESAN

**Address:** Mirpur, Dhaka  
**Phone :** +8801581401065  
**Email :** [habibur.rahman.jesan@gmail.com](mailto:habibur.rahman.jesan@gmail.com)

**Linkedin:** [jesan123](#)  
**Portfolio:** [hr-jesan](#)  
**Github :** [JESAN-HR](#)

## SUMMARY

Computer Science undergraduate (3<sup>rd</sup> year) at Daffodil International University with a strong interest in software engineering and a foundational understanding of programming, software development, and artificial intelligence. Familiar with object-oriented programming, API integration, and applying problem-solving skills through academic projects and self-directed learning. Achieved 5th place in **Agent X: The AI Challenge 2025** and co-authored a research paper on deep learning for marine species detection. Eager to apply and expand technical skills while contributing to real-world software development.

## TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, SQL
- **MS Office :** Microsoft Word , Excel, PowerPoint
- **Databases & Backend (Basic):** Firebase Authentication, Cloud Firestore (*basic usage*)
- **Tools & IDEs:** Android Studio, Visual Studio Code, Code::Blocks, Sublime Text

## EXCPERIENCE & PRACTICAL EXPOSURE

### Application Development (Academic & Self-Learning)

*Self-Directed Projects | 2024 – Present*

- Developed Android and Flutter applications, tools alongside coursework .
- Improved problem-solving and debugging skills by iterating on real applications .

### AI Engineering & Competition Experience

*Agent X: The AI Challenge | 2025 | Organized by Netcom Learning Bangladesh in partnership with Microsoft*

- Designed and submitted a functional & effective Ai Agent / an agentic AI system focused on mental health support as part of final evaluation .
- Ranked **5th out of 5,000 participants**, representing Daffodil International University .

## RESEARCH & PUBLICATIONS

### UnderWaterYOLO: Advancing Multi-Class Marine Species Detection with YOLO Variants

- Co-author (4th author) of an accepted research paper at **ICCCNT 2025**
- Focused on deep learning-based object detection for underwater environments

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                               |
